## CHI SIAMO

CISAL rappresenta un esempio di industria italiana autonoma ed integrata, a ciclo di produzione completo, caratterizzato da soluzioni tecnologiche e gestionali innovative. Cisal è oggi uno dei protagonisti dell'innovazione nel settore, con grande sensibilità per l'efficiente uso delle risorse, in primis acqua ed energia, e costante attenzione allo sviluppo continuo di prodotti innovativi nel design, nei materiali, nel funzionamento e nelle prestazioni. Le Collezioni combinano sapientemente estetica, funzionalità e affidabilità, grazie alla collaborazione con designers internazionali quali Karim Rashid, Giampiero Peia, Fabio Rotella.

1952

Fondata nel 1952 da Liborio Soldi e battezzata CISAL, la società ha attraversato tutte le stagioni dell'epopea della rubinetteria di cui il Cusio è protagonista fin dagli albori.

*Founded in 1952 by Liborio Soldi and named CISAL, the company has gone through all the epic seasons of brassware industry where Cusio has been the protagonist since the beginning.*

1980

Nel 1980 l'Arch. Raffaella Vecchi disegna la serie ARCANA, un prodotto icona classico e storico che apre nuovi orizzonti nei mercati esteri, che si sviluppano passando anche attraverso la creazione di una filiale in Germania nel 1991.

*In 1980 the Architect Raffaella Vecchi, designed the ARCANA series, a classical and historical icon that opens up new horizons in foreign markets, which also led to the establishment of a daughter company in Germany in 1991.*

1981

Dal lavoro di sviluppo interno coordinato da Daniele Sirini, nasce la prima cartuccia a dischi ceramici monocomando. Il nuovo BLITZ apre la gloriosa storia delle serie di miscelazione Cisal.

*The first single handle ceramic disc cartridge was developed internally by Daniele Sirini and his team. The glorious history of Cisal mixer series begins with the new BLITZ series.*

# ABOUT US

*Cisal is the outstanding example of an independent and fully integrated Italian manufacturer, performing the complete production cycle, characterised by innovative technology and management solutions.*

*Cisal is now one of the leading innovators in the industry and is very conscientious about the efficient use of resources, water and energy, and focuses on the continuous development of innovative products with regard to design, materials, function and performance. Thanks to collaboration with international designers such as Karim Rashid, Giampiero Peia, Fabio Rotella, the Collections masterfully combine aesthetics, functionality and reliability.*

1999

Nel 1999, viene realizzato un nuovo stabilimento disegnato dall'Arch. Giampiero Peia e attrezzato con modernissimi impianti di cogenerazione, galvanica e magazzino elettronico. Qui si concentrano le tecnologie più avanzate del settore e si supporta una crescita continua nella progettazione del prodotto, nell'ingegnerizzazione del manufatto e del prodotto finito.

*In 1999, a new factory building designed by the architect Giampiero Peia was built and equipped with modern cogeneration and plating plants along with an electronic warehouse. Here, using the most advanced technologies in the industry, product design and the engineering of the part and the finished product are in continuous development.*

2009

Nel 2009 la famiglia Huber, proprietaria di Huber, leader nella fabbricazione di miscelatori termostatici, decide di fare una scelta strategica per il futuro, acquistando Cisal per garantirle un asse di sviluppo tecnologico e industriale assolutamente vincente: combinare know-how, esperienza e capacità produttive per offrire al progettista e alla clientela una variegata e completa gamma di prodotti integrati a miscelazione termostatica, monocomando e tradizionale.

*In 2009 the Huber family, owner of Huber, a leading manufacturer of thermostatic mixers, decided to make a strategic choice for the future, by acquiring Cisal and providing the company with an absolutely successful technological and industrial development format: to combine know-how, experience and production capacities in order to offer designers and customers a wide and complete range of single lever, traditional, and thermostatic brassware products.*

2019

Karim Rashid presenta gli iconici rubinetti della collezione Vita. Vita si fa notare per la modernità delle linee dallo stile arboero e identitario.

*Karim Rashid presents the iconic taps he designed for the Cisal Vita collection. Vita stands out for the stylish personality of its modern, tree-inspired shapes.*

# ECCELLENZA MADE IN ITALY

Cisal rappresenta un capitolo importante della storia della rubinetteria italiana. Una lunga tradizione di ingegno, mestiere e professionalità, declinata ed esaltata nel rispetto e nella considerazione per l'uomo ed il territorio: il Lago d'Orta, luogo in cui si concentra da generazioni il distretto della rubinetteria, retaggio di artigianalità e cultura del saper fare italiano.

# EXCELLENCE OF MADE IN ITALY

*Cisal represents an important chapter in the history of Italian brassware. A long tradition of ingenuity, skill and professionalism, identified and enhanced in respect and consideration for humans and the territory: Lake Orta, the area where taps have been made for generations, has a heritage of craftsmanship and a culture of Italian know-how.*

## VANTAGGI ACCIAIO INOSSIDABILE

L'acciaio inossidabile è un materiale nobile noto per le sue caratteristiche di punta.

- Durabilità

Gli elementi di lega d'acciaio inossidabile formano sulla superficie un sottile, trasparente strato passivante che si autorigenera immediatamente in presenza dell'ossigeno contenuto nell'acqua e nell'aria, continuando a proteggere la in permanenza la superficie del materiale.

- Sostenibilità

Scegliere l'acciaio inossidabile significa coniugare design, prestazioni e sostenibilità.

Infatti l'industria dell'acciaio ha un eccellente performance ambientale: economizza nell'uso di energia primaria, risparmia le risorse non rinnovabili e riduce gli scarti.

Inoltre, l'acciaio inossidabile non necessita del processo di cromatura.

- Igiene, resistenza alla corrosione

L'acciaio inossidabile è facile da pulire, per questa ragione viene normalmente scelto nelle industrie alimentari e del catering. Naturalmente tutti i materiali usati in casa hanno bisogno di manutenzione e l'acciaio inossidabile non fa eccezione a questa regola. L'acciaio può essere facilmente pulito e l'eccellente resistenza alla corrosione è di estrema importanza. Tuttavia è molto importante eseguire questa operazione con cura e tramite l'uso di prodotti adatti che non danneggino il film passivante peculiare del materiale.

## COME PULIRE L'ACCIAIO

Gli acciai inossidabili sono materiali intrinsecamente resistenti alla corrosione che non necessitano di un ulteriore protezione superficiale per migliorare il loro aspetto e la loro durabilità.

Per mantenere le superfici in acciaio inossidabile in buone condizioni, sono necessarie tuttavia ordinaria manutenzione e pulizia, così che l'aspetto estetico, ma soprattutto la resistenza alla corrosione non siano compromessi.

## STAINLESS STEEL ADVANTAGES

Stainless steel is a noble material known for its leading characteristics.

- Durability

Stainless steel alloy elements form a thin, transparent layer on the surface, a passivating layer that immediately self-heals in the presence of oxygen contained in water and in the air, continuing to permanently protect the surface of the material.

- Sustainability

Choosing stainless steel means combining design, performance and sustainability.

In fact, the steel industry has an excellent performance environmental :

It economises in the use of primary energy, saves non-renewable resources and reduces waste.

In addition, stainless steel does not need the chrome-plating process.

- Hygiene, corrosion resistance

Stainless steel is easy to clean, this is why it is normally chosen in food and catering industries.

Of course, all materials used in our houses need maintenance, and stainless steel is no exception to this rule.

Steel can be easily cleaned and its excellent corrosion resistance is of utmost importance.

However, it is very important to perform this task with care and through the use of suitable products that do not damage the passivating film.

## HOW TO CLEAN STAINLESS STEEL

Stainless steels are inherently corrosion resistant materials that do not need additional surface protection to enhance their appearance and durability. Some routine maintenance and cleaning is needed to keep stainless steel surfaces in good conditions so that the aesthetics appearance and corrosion resistance are not compromised.
